WELCOME TO MY HOME CLINIC

"The comfort and well being of my patient is my biggest goal. The clinic is designed to give each and every patient the atmosphere of comfort, as if visiting a friend, who will listen to your health worries, complaints and will help you get the correct medical care that you need."

Dr. Leila Soudah

ABOUT DR. LEILA SOUDAH

Dr. Leila Soudah is a German Board certified Specialist in Obstetrics and Gynecology. She received her Doctor of Medicine in Berlin University and completed her Post graduation in Hannover University, Germany.

She has spent 20 years in Germany and 21 years in Dubai and continues to strive for excellence in her field. At present, she is the Medical Director, CEO and founder of Dr. Leila Soudah Clinic since 1998.

CLINIC ACHIEVEMENTS:

Certification for Quality Management System – ISO 9001:2015
(Certified and Accredited since May 2006)

First Clinic to pass and comply ISO 15189:2012
Medical Laboratory Accreditation, DAC License LB-098
(Certified and Accredited since May 2012)

In 2013, Dr. Leila Soudah expanded her medical profession to anti-aging, which deals with functional and regenerative medicine, making her a member of American Academy of Anti-Aging Medicine then graduated as American Board Certified in Anti-Aging and Regenerative Medicine.

From then on, she has been a dynamic promulgator of the holistic approach of patient care in women.

In December 2015, she achieved post-graduation as Fellow in Metabolic and Nutrition Medicine in Las Vegas, USA.

With her vast knowledge and determination to impart a healthy lifestyle she launched a DLS Weight Loss program, in which she tailored the comprehensive investigation to accommodate every patient's needs because she believes that there is a main medical reason behind gaining weight.

Aside from these, she is a strong supporter in advocacy of fighting the risk of having breast cancer through the practice of functional and regenerative medicine.

Dr. Leila Soudah devotes and balances her work in commitment to woman healthcare and as mother of two grown- up girls. She is an active community based doctor in The City Hospital where she conducts her operation and deliveries. With her outstanding attendance in local and international seminars, training and congresses, Dr. Leila Soudah has been a favorite invited guest speaker who influence others by her life changing example.

Moreover, she is featured in various magazine like New You and Woman Health of articles about woman's health issues and wellbeing and having appeared on various television interview across the emirates.

Dr. Leila Soudah is committed to her motivation to have a healthy lifestyle, physically fit tone body and be an inspiration to others.

Dr.Ahmad Fakih is an Obstetrician and Gynecologist with an emphasis in Reproductive Endocrinology and Infertility. He attained both his medical degree and his specialty degree from the American University of Beirut. During his training, he was awarded the BEST Teaching Resident award. He was also the president of the Resident Staff Quality Council.

Since joining Fakih IVF he has treated over 2000 infertile couples with high successful rates of pregnancy, and amassed a wealth of experience. He has also taken care of 1000s of pregnant women and successfully delivered them. His interests lie in treating the most challenging and complex infertility problems; (recurrent IVF failures, implantation failures and decreased ovarian reserve). His best days at Fakih IVF are seeing his patients' fertility journey come to an end. Dr. Ahmad is a difference maker.

He is highly qualified to treat all Infertility issues and perform all necessary surgical procedures.

Dr. Ahmad provides personalized patient care, aimed at making the fertility treatment period as stress free as possible for the couple.

Personality: Dr. Ahmad understands the hardships, stress, and the emotional and psychological drain patients feel prior to coming in for treatment. Every patient is given his personal phone number and he is always a phone call away. Dr. Ahmad is a firm believer that the patients overall sense of well-being is vital to her success in the journey of fertility.

Education: Dr. Ahmad received his Medical Degree and specialty degree in Obstetrics and Gynecology from the American University of Beirut. He then went on to complete 2 years of training in Reproductive Endocrinology and Infertility at Fakih IVF

DLS CLINIC OFFERS SERVICES

Obstetrics

Pregnancy is one of the most remarkable milestones in every woman's life.

Dr. Leila Soudah makes you and your baby feel safe in every step of the pregnancy, childbirth and after delivery.

Gynecology

Dr. Leila Soudah is amongst the best gynecologist in Dubai that offers a comprehensive and detailed Gynecological check-up which starts by full history taking, head to toe assessment, and observance of significant signs and symptoms.

Infertility

Infertility is when a couple is unable to contribute to conception after 2 years, despite having regular unprotected contact. If a woman keeps having miscarriages, it will be considered another case of infertility and should also be under the medical care of a specialized doctor.

Personalized Medicine

DLS is an advanced medical clinic in Dubai which deals with a field of clinical endeavor that aims to prevent and cure age-related biomarkers. It is now supported by thorough research and study that we can start offering bio-identical hormone replacement therapy before the hormone level declines to complement the body's needs.

G-Spot

G-spot amplification (GSA), also known as the G-spot shot procedure, is a cosmetic procedure wherein the patient will be administered with FDA-approved human engineered collagen that can enhance the feeling in their G-spot.

O Shot

When it comes to addressing concerns regarding intimacy, many women continue to suffer in silence. From the natural aging process to menopause and childbirth, there are a number of issues that can trigger a loss of sensation in the intimate region of the female body.

BHRT

The most basic functions of your body are controlled by its hormones. Hormones are essential in regulating growth, development, major bodily functions, moods and emotions of an individual.

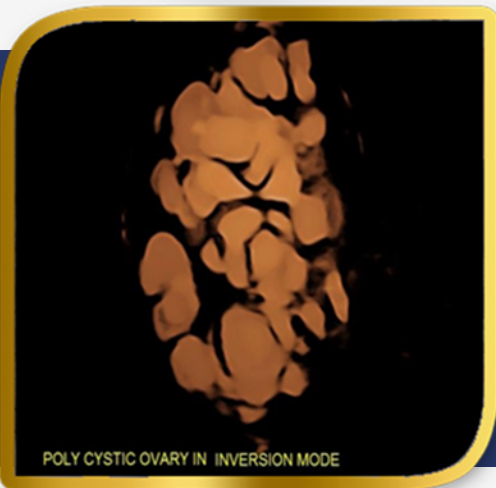

Breast Cancer

Based on medical statistics, 20 % of breast cancer is caused by genetics and 80% is due to environmental factors.

Vaginoplasty Surgery

A woman's intimate area goes through certain changes which can affect its laxity. As a woman ages, the surrounding muscles and tissues tend to relax uncharacteristically. Although it does not cause any pain, it can cause embarrassment during moments of intimacy.

PCOS

PCOS or Polycystic Ovary Syndrome affects countless women of reproductive age around the world these days. While the cause of the issue continues to remain unknown, it is believed by experts that the condition is triggered due to a disbalance of hormones that not just impacts female fertility, but their physical and emotional well-being too.

Labia Reconstruction Surgery

Cosmetic surgeries have gained immense popularity in the last few years. Over the years, several unique surgeries have been introduced, and on top of the list is labia reconstruction surgery.

Intimate Surgery

Women today feel insecure about their bodies, even parts and regions that are hidden to the naked eye. This includes their intimate parts. Although hidden, its appearance can affect a woman's confidence and self-esteem, and through the years, these areas can lose feeling and function due to aging and other factors.

Rejuvenation

Rejuvenation services aims to restore youthful vigor and strength of women's intimate area by repairing damaged tissues, hence, slowing down the process of aging. At DLS Clinic, we offer you premium quality rejuvenation services.

Weight Loss

Uncontrolled weight gain may result to certain threatening conditions such as stroke, cardiovascular diseases, Diabetes Mellitus Type 2, irregular periods or even amenorrhea (absence of menstruation) and some other diseases related to lifestyle changes.

Genetic Testing

We always wish and hope for a better and healthier life. However, no one can truly tell what the future has in store for us; especially when it concerns our health. Now, with the advanced breakthroughs in Personalized Medicine it's a dedication that you can make A CHOICE to determine your own DESTINY to a better quality of life and a healthier tomorrow.
